

Floats all the way down, on both pages

I hate this, not sure what we could do with it

Serif title, sans serif body look nice

Subtle newspapers in background?

Nav to contact as main CTA

Could be better just photo, headline on flipside

Sally to add 'featured' tag to articles for front page

De-saturate others on hover

Link to other page of site, all articles

Again pretty messy but you get the idea

Any links we could add here?
